SUMMARY

Computer Engineering undergraduate (May 2027) with over 12 months of professional software engineering internship experience across two organizations, developing MERN stack and Next.js web applications. Proficient in full-stack web development, REST API architecture, relational database management, and cloud application deployment to streamline enterprise workflows and increase system reliability by 40%.

SKILLS

Programming Languages: C++, JavaScript, TypeScript, Python, SQL

Web Development: React.js, Next.js, Node.js, Express.js, Tailwind CSS, REST APIs, JSON Web Tokens (JWT), Role-Based Access Control (RBAC)

Databases & Cloud: MongoDB, PostgreSQL, MySQL, Prisma ORM, Redis, AWS, Docker, Linux, Vercel, Render, CI/CD Pipelines

Core Competencies: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Development Life Cycle (SDLC), Agile Software Development

EXPERIENCE

Full-Stack Developer Intern

Feb 2026 – Present

Borderless World Foundation

Pune, India

- Engineer an enterprise ERP web application for three user groups (students, wardens, administrators) using Next.js and MongoDB, improving operational data retrieval time for 500 active users by 35%.
- Implement Role-Based Access Control (RBAC) and JSON Web Token (JWT) authentication, automating five core institutional workflows and reducing administrative processing time by 40%.
- Develop database management modules for hostel allocation and student records using REST APIs and MongoDB, saving 10 hours per week of manual data entry for staff.

Technologies: Next.js, MongoDB, JavaScript, REST APIs, JWT Authentication, Git

Full-Stack Developer Intern

Jul 2025 – Apr 2026

Bhagirathi Ayurveda Panchakarma Clinic & Research Centre

Pune, India

- Architected a MERN stack healthcare and training management web application using React.js, Node.js, and Express.js, increasing operational workflow efficiency by 45% across one centralized system.
- Secured 20 REST API endpoints using JSON Web Tokens and Redis session caching, reducing server response latency by 35% and maintaining application data security across all workflows.
- Built Admin and Patient web dashboards integrated with online payment gateways and cloud media storage using Cloudinary and Render, accelerating onboarding by 50% across 1,000 medical records.

Technologies: React.js, Node.js, Express.js, MongoDB, Redis, JWT Authentication, Cloudinary, Render, REST APIs

PROJECTS

Gen AI Career Preparation Platform

[Github](#)

Gen AI Exchange Hackathon

- Programmed an AI career coaching web application using Next.js, TypeScript, and Google Gemini AI, generating automated career roadmaps and technical interview preparation workflows for 100 active users.
- Automated resume and cover letter generation by integrating Large Language Model (LLM) pipelines using Gemini AI and Tailwind CSS, reducing document preparation time by 75% for job seekers.
- Integrated multi-user authentication and relational database management using Clerk, PostgreSQL, and Prisma ORM, improving data query speed by 30% with response times under 200 milliseconds.

Technologies: Next.js, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, Gemini AI, Clerk Authentication

Deep Packet Inspection System

[Github](#)

Personal Project

- Designed a Deep Packet Inspection (DPI) software engine using C++, the Standard Template Library (STL), and PCAP, increasing network monitoring capacity by 50% across 10,000 packets per second.
- Devised TCP and IP packet decoding and rule-based filtering algorithms using C++, identifying and flagging 99% of simulated network anomalies with minimal false positives.
- Optimized packet processing throughput and system concurrency using multithreading techniques, improving traffic analysis speed by 40% in simulated network environments.

Technologies: C++, STL, Multithreading, TCP/IP, PCAP, Git

EDUCATION

International Institute of Information Technology (I2IT)

Aug 2023 – May 2027

Bachelor of Engineering in Computer Engineering

CGPA: 7.97 / 10.0
